1868.

QUEENSLAND.

EIGHTH ANNUAL REPORT

ON

REGISTRATION OF BIRTHS, MARRIAGES, AND DEATHS.

Presented to both Houses of Parliament by Command of His Excellency the Acting Governor.

TO THE HONORABLE ARTHUR HUNTER PALMER, ESQUIRE, COLONIAL SECRETARY, ETC., ETC.

Registrar-General's Office,
Brisbane, 1st July, 1868.

SIR,

I have the honor to forward to you for presentation to Parliament, the Eighth Annual Report on the Vital Statistics of Queensland.

On the 31st December, 1867, the estimated population of the Colony was 99,849, consisting of 59,836 males and 40,013 females, the relative proportion of the sexes being on that day 66·87 females to each 100 males.

During the year 1867 the following additions were made to the population, viz., 2,529 males and 1,119 females—in all, 3,648 persons. Of this increase the portion arising from the excess of registered births over registered deaths was 2,731 persons, consisting of 1,187 males and 1,544 females, the proportion of the sexes in this increase being 130·08 females to males.

Table 1 shows how the increase of births over deaths was distributed during the four quarters of the year.

I.

	Males.	Females.	Total.
Excess of Births over Deaths during First Quarter	134	299	433
Excess of Births over Deaths during Second Quarter	313	364	677
Excess of Births over Deaths during Third Quarter	422	496	918
Excess of Births over Deaths during Fourth Quarter	318	385	703
Total Increase during the Year	1,187	1,544	2,731

The above increase, compared with the estimated population of 1866, was at the following centesimal rate:—

Males, 2·07; females, 3·97; of persons, 2·84.

The following table shows the annual rate of increase in the mean population of each of the last seven years, arising from the greater number of Births than of Deaths:—

1860	2·81 per cent.
1861	2·92 per cent.
1862	2·27 per cent.
1863	1·75 per cent.
1864	2·12 per cent.
1865	2·23 per cent.
1866	1·92 per cent.
1867	2·79 per cent.

The following table shows the proportion that the total number of Births in each year bears to the female portion of the mean population of that year:—

Year 1860—11·24 births to each 100 femeles
Year 1861—11·26 births to each 100 females
Year 1862—10·71 births to each 100 females
Year 1863—10·53 births to each 100 females
Year 1864—10·97 births to each 100 females
Year 1865—11·21 births to each 100 females
Year 1866—11·25 births to each 100 females
Year 1867—11·35 births to each 100 females.

BIRTHS.

The number of Births registered during the year amounted to 4,476, showing an increase in number of 349 over that of the previous year, and a centesimal rate of increase of 8·46.

The following table supplies full information touching the relative number of Births during each of the years 1866 and 1867.

II.

MARRIAGES.

The number of Marriages celebrated in 1867 were 153 less than in 1866, being a centesimal decrease of 12·45. The table, being a comparative one, shows the number of Marriages solemnized by ministers of different denominations throughout the Colony, as well as the number of those performed by the various Registrars, for the years 1866 and 1867. A glance will at once show where any increase or decrease has taken place.

The following table is published as a guide to the classification adopted in the Nosological Tables appended hereto, which tables it may be observed are modelled on the tables introduced by Dr. Farr, and now in use in England and in the neighboring colonies of New South Wales and Victoria.

ZYMOTIC DISEASES.

CLASS I.	Per centage.
1. Miasmatic Diseases.—Scarlatina, Diphtheria, Dysentery, Fevers, &c.	25·73
2. Enthetic Diseases.—Syphilis	0·06
3. Dietic Diseases.—Privation, Scurvy, Delirium Tremens, &c.	0·86
4. Parasitic Diseases.—Thrush, Worms, &c.	0·75

CONSTITUTIONAL DISEASES.

CLASS II.	
1. Diathetic Diseases.—Gout, Dropsy, Cancer, &c.	2·80
2. Tubercular Diseases.—Scrofula, Phthisis, Hydrocephalus, &c.	8·25

LOCAL DISEASES.

CLASS III.	
1. Diseases of the Nervous System.—Apoplexy, Paralysis, Insanity, Cephalitis, Convulsions, Brain Disease, &c.	13·87
2. Diseases of the Organs of Circulation.—Aneurism, Heart Disease, &c.	3·38
3. ,, Respiratory System.—Bronchitis, Pneumonia, Asthma, Pleurisy, &c.	5·79
4. ,, Digestive Organs.—Gastritis, Enteritis, Peritonitis, Hernia, &c.	5·04
5. ,, Urinary Organs.—Nephritis, Ischuria, Diabetes	0·40
6. ,, Organs of Generation.—Ovarian Dropsy, Uterus Disease, &c.	0·17
7. ,, Joints.—Arthritis, Ostitis, Periostitis, &c....	0 11
8. ,, Integumentary System.—Phlegmon, Ulcer, Skin Disease, &c.	0·23

DEVELOPMENTAL DISEASES.

CLASS IV.	
1. Diseases of Children.—Cyanosis, Teething, &c.	5·33
2. ,, Adults.—Paramenia, Childbirth, &c.	0·92
3. ,, Old People.—Old Age, &c.	1·72
4. ,, Nutrition.—Atrophy, Debility	7·39

VIOLENCE.

CLASS V.	
1. Accident or Negligence.—Fractures, Contusions, Burns, Drowning, Suffocation, Wounds, &c.	9·80
2. Wounds in Battle.—Gunshot Wounds, Sword, Bayonet, or other Wounds	0·00
3. Homicide.—Murder and Manslaughter	0·34
4. Suicide.—Poison, Drowning, Hanging, &c.	0·46
5. Execution.—Hanging	
Sudden Deaths, cause not ascertained	0·29
Unspecified or Ill-defined	5·79

I have the honor to be,
Sir,
Your most obedient Servant,

FRED. RAWLINS,
Registrar-General.

APPENDIX TO REGISTRAR-GENERAL'S REPORT ON THE VITAL STATISTICS OF QUEENSLAND FOR THE YEAR 1867.

Table No. 1.

SYNOPSIS of the VITAL STATISTICS of QUEENSLAND, from the YEAR 1856 to 1867 inclusive.

YEAR.	POPULATION ON THE 31st DECEMBER OF EACH YEAR. ITS INCREASE NUMERICAL AND CENTESIMAL, AND PROPORTION OF THE SEXES.													MEAN POPULATION OF EACH YEAR, ITS NUMERICAL AND CENTESIMAL INCREASE.									BIRTHS, THEIR PROPORTION TO MEAN POPULATION OF EACH YEAR, AND THEIR NUMERICAL AND CENTESIMAL INCREASE.							
	POPULATION ON THE 31st DECEMBER.			NUMERICAL INCREASE IN POPULATION OF 31st DECEMBER.			CENTESIMAL RATIO OF INCREASE IN POPULATION OF 31st DECEMBER.			Proportion of Females to each 100 males in total population of each year.	Male additions to Population of 31st December of each year arising from excess of births over deaths.	Female additions to Population of 31st December of each year arising from excess of births over deaths.	Total additions to Population of 31st December of each year arising from excess of births over deaths.	Centesimal increase to Population of 31st December of each year from excess of births over deaths.	MEAN POPULATION OF EACH YEAR.			NUMERICAL INCREASE IN MEAN POPULATION OF EACH YEAR.			CENTESIMAL RATIO OF INCREASE IN MEAN POPULATION OF EACH YEAR.			Proportion of Females to each 100 males in mean population of each year.	Male Births registered each year.	Female Births registered each year.	Total Births registered each year.	Numerical Increase of Births of each year.	Centesimal Increase in Births of each year.	Centesimal proportion total Births bear to mean population of each year	Number of Female Births to each 100 Male Births.

Total rainfall during the year, 61·04; days on which rain fell, 112; total evaporation, 42·313 inches.
Mean temperature of the year, 70·1.

NOTE.—The reading of the barometer is corrected to 32° Fahrenheit and mean sea level. In the Table of Humidity, 1—saturation; cloud, 10—whole sky.

MAXIMUM TEMPERATURE in SUN (Solar Radiation), on each day during the Year 1867.

The sun's position necessarily produced an immense amount of evaporation, which usually at this season falls in torrents of rain. This year, however, the rainfall has been very moderate, being only a little more than one-third of that of last year, the remainder of the moisture which the atmosphere could not retain having been got rid of by the copious dews which fell at night in the intervals of the rains. The temperature by day was generally high, but rather low, for the season at night; and by this means the average for the month did not materially exceed that of January last year. The winds were usually light and variable, with frequent calms, until the 24th, when they became steady at south-easterly points, and continued so until the end of the month.

·834	·868	·856	·693	·769	·810	86	80	6	102	75	3	3	1	·02	...	...	1	5	The weather for this month closely resembled that of the last. The rainfall was signally and remarkably small for the season, and as a consequence, the temperature was generally high by day, and cool at night, with heavy dews in the intervals between the rains. The winds continued light and very variable, with frequent calms throughout, but the weather, notwithstanding all these disadvantages, was rarely sultry, and never oppressive.

·916	·909	·897	·910	·948	1·000	85	75	10	Clouded	74	9	10	3	·40	...	...	2	3	The increased rainfall for this month, though considerably less than that of March last year, reacted on the temperature, and other atmospheric agencies, to such an extent as to cause the weather to partake of the characteristics usually prevailing during the rainy season. The change of seasons, preceded by a few light thunderstorms, took place on the 18th, when the south-easterly wind resumed its ascendancy, but the rains continued equally as heavy, with the wind at south-east, as when it blew from the opposite direction.

·945	·964	1·000	·811	·854	·946	86	81	5	100	76	9	8	3	...	...	...	3	6	While the rainfall for April, 1865, only amounted to ·03 inches, and for April, 1866, to 3·35 inches, this month it reaches the comparatively large quantity of 15·33 inches, which increase affords strong proof, that when the normal phenomena of any of the seasons are retarded or interrupted by any cause, compensating influences are almost invariably brought into play subsequently, for the purpose of restoring the equilibrium so disturbed, or interrupted. I did anticipate visitations of this kind, and having observed them, I am in a position to state as a fact, what I had only inferred previously from hearsay,—"That, although we are far within the tropics here, the climate differs materially from that of other tropical countries, and is likely to vary within certain limits from one year to another, as climates do in extra tropical countries." Towards the end of the month, the wind changed to the west and south-west, and the air became remarkably dry, and the range of temperature in the twenty-four hours unusually high. The reason is obvious, and the change from the comparatively moisture-laden atmosphere, coming to us as it does over such a wide expanse of sea, which usually prevails, was decidedly pleasant and enjoyable.

·681	·610	·749	·540	·541	·755	87	67	20	112	63	1	5	2	...	...	...	2	7	The heavy rainfall for this month, 9·47 inches, when contrasted with that for May last year, ·49 in hes, affords further corrobocative proof of the correctness of the assumed law, "That compensating influences are, as a rule, brought into play, in order to restore equilibrium when the normal progress of the seasons is interrupted or retarded by any means." The only disadvantage hitherto experienced from the change of weather has been a slight increase of temperature, and some sultriness before the setting in of the rains, which, even at the end of the month, showed no tendency to cease. The winds continued steady at south-easterly points, excepting occasionally at "full" and "change" of the moon, when they became light, and blew off the land at night; thus assuming the character of the land and sea breezes experienced in most tropical countries, where, instead of the narrow spur constituting this peninsula, there happen to be wide expanses of land, which become every day heated by the sun, and thereby produce the physical conditions necessary giving rise to land and sea breezes. The irregularity of the tides at uncertain periods, so frequently observed hitherto, but only while the south-easterly winds prevail, has been also noticed this year; while the quantity of ozone in the atmosphere, when compared with that registered for the corresponding months last year, shows a considerable increase.

·978	·978	·862	·856	·856	·900	83	75	8	98	72	5	10	10	·02	...	...	5	9	The continuance of heavy rains two months beyond the usual period, though beneficial to pasturage and agriculture, maintained hitherto a higher degree of average heat than was experienced for the last two years during the corresponding months; and even this month, although the amount of rainfall only very slightly exceeded that of June for the two last years, the atmosphere was unusually humid, and the temperature nearly two degrees (2°) higher. The wind usually varied between east by south or east-south-east in the morning to south-east or south-south-east in the evening, and backed again at night; its force was, likewise, much greater by night than by day, a circumstance generally observable within the tropics, and attributable to the rarefying effects of solar heat, while its direction was interrupted for a few days, at the period of "Full Moon," when it assumed the character of a "Land" and "Sea" Breeze.

The atmosphere was generally humid, although the rainfall was small, and the wind varied in direction and force exactly as it did last month. The temperature, however, was half a degree (·5°) less, but the difference was scarcely appreciable.

APPENDIX D.

RETURN of the Registration Districts, with the Names of the Persons holding the Office of District Registrar.

METROPOLITAN DISTRICT.

FREDERICK RAWLINS, Registrar-General.
WILLIAM THEOPHILUS BLAKENEY, Deputy Registrar-General.

COUNTRY DISTRICTS.

Banana	W. H. CLYDE.
Bowen	HENRY BRAMSTON.
Broadsound	HORACE BURKITT.
Cardwell	HENRY RICHARDS.
Carpentaria (Burke)	GEORGE F. SANDROCK.
Cleveland Bay (Townsville)	JAMES GORDON.
Condamine	GEORGE L. LUKIN.
Dalby	F. W. ROCHE.
Drayton and Toowoomba	WILLIAM MURPHY.
Gayndah	MATHEW AIREY.
Goondiwindi	ROBERT VINCENT.
Ipswich	WILLIAM HENDREN.
Isaacs East (Nebo)	SYDNEY MOORE.
Leyburn	BENJAMIN CRIBB, Junr.
Mackay	JOHN T. BAKER.
Nanango	W. C. N. BUSSELL.
North Cook (Somerset)	HENRY G. SIMPSON.
Peak Downs (Clermont)	HUGH STOWELL.
Port Curtis (Gladstone)	JOHN S. POWE.
Princhester	HENRY ELLIS succeeded by WILLIAM MONTEITH succeeded by O'BRIEN DILLON succeeded by BENJAMIN ROWLANDS.
Rockhampton	FRANK N. BEDDEK.
Roma	JOHN MOOREHEAD.
St. George	QUINTIN A. THOMPSON.
Springsure	JOHN GEORGE WHEELER succeeded by CHARLES SHORT DICKEN.
Surat	RICHARD T. TAYLOR.
Tambo (Mitchell)	GEORGE HALLAM.
Taroom	WILLIAM CAVE.
Warrego (Charleville)	CHARLES CLAUDIUS CARTER succeeded by WM. O. NORRIS.
Warwick	W. H. BROWN.
Wide Bay (Maryborough)	JOHN H. STEVENS.
Woogaroo	KEARSEY CANNAN.
